AFAN BAIHAQI

Full-Stack Developer — Frontend-Focused / React · TypeScript · REST APIs

Tangerang, Indonesia | baihaqiaffan11@gmail.com | +62-877-3624-0463

PROFESSIONAL SUMMARY

Information Technology student (D3, CCIT FTUI) and Full-Stack Developer with hands-on experience across the modern web stack HTML5, CSS3, JavaScript/TypeScript, React, and Tailwind CSS on the frontend, with backend exposure to Java Spring Boot and CodeIgniter. Comfortable working with REST API design and integration, relational databases (MySQL, PostgreSQL), and containerized workflows (Docker, GitHub Actions/CI-CD). Proven track record maintaining production website content and frontend structures in a professional setting, with a strong, self-directed focus on leveling up backend and Linux server administration skills through continuous, hands-on practice.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript, TypeScript, React, Tailwind CSS
- **Backend & APIs:** Java, Spring Boot, CodeIgniter, REST API
- **Databases:** MySQL, PostgreSQL
- **DevOps & Tools:** Git, GitHub, Docker, GitHub Actions, CI/CD
- **Mobile & Other:** Flutter, UI/UX, Responsive Web Design, Team Collaboration
- **Currently Learning:** Linux Server Management, Server Deployment, Backend & DevOps Practices

WORK EXPERIENCE

Web Content Administrator — Bizantum Tech Insight *2024 – 2025*

- Managed and integrated website content within the existing web framework and page structure.
- Organized and positioned content to maintain consistent layouts and a user-friendly interface.
- Worked with frontend structures such as HTML and page layout to support website development and content presentation.
- Ensured website content was properly implemented and visually consistent across pages.
- Collaborated with the development team while maintaining strong attention to detail and quality.

PROJECT EXPERIENCE

Company Profile Website — React / TypeScript / Vite / Tailwind CSS

- Developed a modern company profile website with a responsive interface, reusable components, and a structured frontend architecture, integrated with a REST API.

REST API & Backend Development — Java / Spring Boot / PostgreSQL

- Developed backend services using Spring Boot and RESTful API architecture with relational database integration and standard API operations.

CI/CD & Docker Project — Docker / GitHub Actions

- Built a development and deployment workflow using Docker and GitHub Actions, practicing containerization, automated builds, and CI/CD concepts.

Pharmacy Management Application — Flutter / Spring Boot

- Worked on a mobile-based pharmacy administration application connected to backend APIs, covering interface development and service integration.

EDUCATION

Information Technology (D3), CCIT FTUI, Universitas Indonesia — In progress, 2024–Present

Focused on software development, web technologies, programming, databases, software testing, and development workflows.

ADDITIONAL STRENGTHS

- Frontend-focused Full-Stack Developer with a strong willingness to grow on the backend.
- Solid understanding of REST API integration and modern web development workflows.
- Practical experience with Docker and CI/CD concepts.
- Detail-oriented, collaborative, and committed to writing maintainable code.
- Fast learner with strong motivation to explore unfamiliar technologies and gain hands-on, real-world experience.
